

GREENWOOD ATHLETIC CLUB SELECTS CSI SOFTWARE

Houston, TX - May 15, 2006 CSI Software announced today that the Greenwood Athletic Club has selected CSI Software as its new club management software system. The facility will be using Member Management, Front Desk Check In, Point of Sales, Inventory, Accounts Receivable, Program Registration, Prospect Management, Series Sales, Locker Management, Contract Management, Gift Card Management, Health and Fitness and Online Services.

The Greenwood Athletic Club is a 82,000 square-foot multipurpose facility in Denver and is one of the state's most luxurious clubs. GAC features indoor and brand new outdoor pools, an indoor running track and outdoor running trails, a 52,000 square -foot indoor clay court tennis center, three exercise studios (including a heated yoga studio), an indoor cycling studio, two cardiovascular rooms with state-of-the- art equipment, a full-service Pilates studio, and a 5,100-square-foot weight room. For more information on the Greenwood Athletic Club, logon to <http://www.greenwoodathleticclub.com/home.php>

24/7 Online Services

"We are truly looking forward to the member management capability that CSI software will offer us" says Molly Kemmer, Assistant GM of the Greenwood Athletic Club. "We are impressed with the level of detail that CSI allows when sorting, managing, and storing member data. The health club industry is shifting towards hyper-hi-tech when it comes to fitness equipment and club support systems. Our members can order a book online that is delivered to their front door. They can step on a cardiovascular machine in our club that has built in hi-def TV. They now expect to be able to connect to a real-time online system and reserve a tennis court, schedule a class, or check their club charge account. CSI software opens the door for our members to take full advantage of the services our club offers, from virtually anywhere."
