Life Center of Greenville Hospital to Standardize on CSI Software

Houston, TX. 07-15-2008 08:00 AM

CSI Software announced today that the Life Center of Greenville Hospital has selected Spectrum NG by CSI Software as its new enterprise management system.

The Life Center operates two facilities - a 55,000 square-foot facility in Greenville, SC, and a 9,600 square-foot facility in Simpsonville, SC.

The Life Center will be CSI Software's hosting services. In addition to alleviating many of the IT headaches associated with deploying an application, it will provide the Life Center with Level 1 PCI Compliance - a major driving force behind their decision to purchase new software.

The Life Center will be leveraging Spectrum NG's Online Services module - a customer-facing web portal that will allow customers to register for programs, schedule personal training appointments, make payments and manage their account, all online, real-time.

Supporting Quotes

"The Life Center is one of the first wellness centers to take advantage of our hosting services" says Andy Wigderson, Vice President of Sales and Marketing at CSI Software. "We are one of the few vendors in this space that is certified Level 1 PCI and PABP Compliant, which made the decision for them very easy."
