

TRAINING SERVICES 2006

Worldwide training in CSI Software is available through on-site training or over the Internet. Our training experts ensure success by transferring skills and knowledge to administrators and users of CSI Software products at every stage of deployment. As with our support services, our training courses have one main objective - to provide your organization with everything you need to succeed.

ON-SITE TRAINING

When you schedule on-site training, a CSI Software trainer brings the training to you. This option is ideal for organizations that want more individualized instruction.

WEB SEMINARS

We offer interactive, instructor-led, on-line training seminars. Customers can converse with peers and ask questions

eLEARNING LIBRARY

We offer a self-paced collection of on-line software lessons that provide step-by-step training for various modules. This is ideal for organizations that have a lot of staff turnover.

REGIONAL TRAINING SEMINARS

We offer classroom training at various locations in the United States. These regional locations offer state-of-the-art equipment and workstations

ANNUAL CONFERENCE

Our annual user conference is scheduled to take place September, 2006, at The Houstonian in Houston, TX. This conference provides the latest information about our products and an opportunity for customers to provide direct feedback to CSI Software professionals. Our annual conference provides an excellent opportunity for CSI Software customers to network with peers, exchange ideas, solve business challenges and discover the latest functionality.
