

UNIVERSITY OF ALABAMA CHOOSES CSI SOFTWARE

Houston, TX - August 10, 2006 CSI Software, the leading provider of software and services for campus recreation centers, announced today that the University of Alabama Tuscaloosa has chosen CSI Software for its Student Recreation Center.

The 70,000 sq. ft. facility includes a four-court gymnasium, food concessions, nine basketball courts, a 17,000 sq. ft. fitness area, outdoor leisure area and a tennis complex.

Improve Business Processes

According to George Brown, Executive Director of University Recreation, CSI Software was selected after careful review.

"We wanted a software solution that allowed us to learn as we grew and to be able to handle our needs over a long period of time" says Brown. "Ultimately we believe that with CSI's knowledge and training reputation as well as their willingness to adapt to our unique situation we will realize the full extent of the capabilities of the system. To date the software has already allowed us to think of processes and methods of doing business that will make our operations more efficient and effective."
